CHOOSING THE RIGHT FENCE MADE EASY

When it comes to choosing a fence we understand that you want a fence that ticks all the boxes: **Good Looking**, **Easy to Maintain** and **Durable**. That's why at Metroll we manufacture a range of fence profiles made from genuine COLORBOND® steel. Couple that with our exceptional engineering and local manufacture and you can't go wrong choosing the right fence.

Why a Metroll Fence?

✓ Quality Guaranteed

Don't be fooled, not all fences are created the same, so at Metroll we pride ourselves on ensuring we factor in all the important items that make our fencing the better choice.

Manufactured using only 100% Australian made BlueScope COLORBOND® steel. Not all coloured steel fencing is made from COLORBOND® steel. It's easy to check; COLORBOND® steel fencing is branded with a laser engraving on either side of the fence at least three times on each 2.4m section.

✓ Warranty

Manufactured for compliance to all relevant Australian Standards and backed by a warranty of up to 10 years from BlueScope*.

✓ Low Maintenance

No painting - simply hose clean!

✓ Tried & Tested

COLORBOND® steel is made specifically for the harsh Australian climate with 50 years of testing and an unbeatable reputation for strength and durability.

✓ Made Locally

Manufactured locally with no lengthy wait times and the flexibility to supply non-standard lengths.

✓ Accessories

Includes a range of accessories to help personalise your fence and which can be added post-installation.

✓ Colour Choice

Available in the fabulous range of 14 COLORBOND® colours.

✓ Better Privacy

Say goodbye to that gap in the fence and the annoying fence rattle. When installed correctly, Metroll's range of fencing has smooth surfaces and close fitting panels without gaps, visible footholds or loose palings.

EASY MAINTENANCE

Keeping your Metroll fence looking it's best could not be easier, simply hose it down periodically with water and use a soft broom to remove any cobwebs. Avoid letting soil or garden fill build up against your fence as this will retain water and cause corrosion. Avoid spraying your fence with garden sprays and fertilisers as this may damage the fence. Should this occur, simply wash the fence down with water.

Made in Australia

CHOOSE FROM OUR FENCING CLASSIC...

Trimclad

There is always a place for classics and the Trimclad® profile from Metroll is a long standing fencing favourite.

OR ONE THAT SUITS YOUR NEIGHBOUR TOO...

Harmony

Harmony is the ultimate in fencing profiles that gives both neighbours the best side of the fence. Not only does it look great, but it has been engineered to be strong and overlap cleanly.

THINGS TO CONSIDER WHEN PLANNING YOUR FENCE

The key to getting things done right is often in the planning, the same applies when you are looking to install a fence. Getting the details right before you start will ensure your fence is long lasting and trouble free. Be sure to take the time to address the following items:

Installation

If the ground is not level where your fence is being installed you will need to consider if the fence will be stepped or raked. You will also need to taper the end of your fence over the last two panels where there is no corner, unless you live in Wind Region A or Terrain Category 3 of Region B. Ask your fence installer for more detail.

Post Footings

Suitable post footings are critical to the correct installation and performance of your fence. If post footings are inadequate your fence is likely to wobble and even fall over. There are a number of variables that need to be considered when establishing the correct footing requirements; these include Post and Rail Lengths, Wind Region, Terrain Category and the type of ground the fence will be installed into. Your fence installer needs to factor in all of these items to ensure your final fence is solid and long lasting.
